SKILLS

- Backend: Python, Django, Django REST API, SQL (MySQL, SQLite3, Supabase)
- Frontend: HTML, CSS, Bootstrap, JavaScript
- Concepts: Data Structures, Problem Solving (CodeForces, LeetCode)

PROJECTS

Net Book (Social Media)

NetBook is a social media platform that connects users through shared interests and experiences, providing easy communication, content sharing, and opportunities for community engagement.

Features:
- User Profile: Users can create and customize their profiles to display personal information, interests, and activities, making it easier to connect with others.
- Content Sharing: Seamlessly share text posts and photos, allowing users to engage with their network and express themselves creatively.
- Friend System: Users can send and receive friend requests, enabling them to build connections and interact with friends on the platform.

Technologies: Django, Django REST API, Database(Supabase), HTML, CSS, BootStrap, JavaScript

Smart Soft (Point of Sale Software)

SmartSoft is a comprehensive point-of-sale software application that manages users, products, sales, purchases, stock, and other entities essential to store management.

Features:
- Sales Management: POS software manages sales transactions, allowing for real-time tracking of sales data, generating invoices, and facilitating payment processing.
- Daily Sales, Profit, and Purchase Report: POS software generates concise reports on daily sales, profit, and purchase data, helping to analyze business performance.
- Stock Management: POS software effectively manages stock levels, providing real-time tracking of inventory quantities and automatic alerts for low stock.

Technologies: Django, Django REST API, Database(Supabase), HTML, CSS, BootStrap, JavaScript
